Mandarin Chinese

Education: Touro School of Osteopathic Medicine, Harlem, NY

Residency: CarePoint Health - Christ Hospital

Fellowship: LAC + USC Keck School of Medicine

Board Certification: Family Medicine and Geriatric Medicine

⋮ **“Taking care of the elderly is a privilege. Each care plan should be customized to the complex individual that it's created for to treat their specific combination of issues.”**

Dr. Chen grew up in the San Gabriel Valley. She loves taking care of older patients because they've lived long lives and have so many stories to tell. Dr. Chen understands that seniors' stories and experiences can directly influence the care that they hope to receive.

Dr. Chen creates an individualized plan of care for each person, taking into account their caregivers, their social lives, and other factors that go into their care outside of purely medicine. She approaches each patient as a whole person and ensures every aspect is being treated.

When she isn't seeing participants, Dr. Chen loves to read and plan her next vacation.
